

ICAR- National Research Centre on Camel, Bikaner

Note

Camel milk availability at ICAR-NRC on Camel, Bikaner, Rajasthan

Looking into the demand of camel milk that has increased surprisingly due to its beneficial effects in some human disease conditions, the Milk Parlour and Experimental Camel Dairy located in the campus are trying hard to meet demand of consumer, but due to limited number of animal in lactation and available resources' at present establishment, we cannot ensure all to provide milk as per their requirement. Therefore, people from Rajasthan and Gujarat and adjoining areas are advised to approach nearest camel keepers/farmers to fulfill their requirement. This will help the persons from very distant part to collect milk from NRCC.

Those who are approaching NRCC to procure camel milk, are advised to get confirmed about availability of camel milk as per their requirement with confirmed date then only plan to visits this place for collection.
