

Scientist-Entrepreneur Meet on Camel Leather and Bone products

24th February, 2019, Bikaner

The ICAR-National Research Centre on Camel, Bikaner organized the “Scientist Entrepreneur Interactive Meet for value addition of leather and bone obtained from Camel” here at its campus today.

Dr. R.K. Sawal, Director, ICAR-NRC on Camel said besides, holding the importance from the business perspective and also being liked by the tourists, the camel leather is specially processed to be used for the traditional Usta Art of Bikaner.

The participants were also encouraged for refining their existing skills for improving the presentation and quality of products developed for better employment opportunities.

The main aim of the meeting was to address the issues of rising demand and the expectations for quality products.

The scientists of the Centre and ICAR Institutes at Bikaner attended the meeting.

The entrepreneurs and artisans were exhibited the various products namely bags, belts, caps, different kinds of leather purses, folder bag, different kind of shoes, etc., prepared from the camel bone.

A total of 30 entrepreneurs engaged in leather processing and manufacturing of different leather products from participated in the meet.
